Experience

- **Global Digital - Analytics Manager**, Specialized Bicycle Components — Mar 2026 - Present
 - Guiding the analytics practice for Global Digital and Specialized more broadly.
- **Global Digital - Senior Data Analyst**, Specialized Bicycle Components — Oct 2022 - Mar 2026
 - Led analytics initiatives for the global digital business, supporting reporting, analysis, and insight generation across marketing, product, operations, finance, and executive leadership.
 - Partnered with technology & business leaders to design data solutions that give visibility into operational performance for major global initiatives.
 - Positioned Global Digital as a leader in data-driven operations, leading to requests for support & guidance across the organization.
 - Architected tracking for the global ecommerce site, designing the data layer and implementation across 30+ ecommerce-enabled countries.
 - Engineered product datasets using SQL & ETL tools, combining 10+ data sources, enabling end-to-end visibility into product movement from manufacturer to warehouse to customer.

- Analyzed customers subscribed to marketing, finding they had +47% higher LTV than non-subscribed customers, so the business increased focus on growing subscriptions.
 - Reduced manual reporting by 50% across the Global Digital business, creating self-serve reports supported by robust documentation.
 - Identified \$2M in annual revenue leakage from a global promotion change; presented analysis to Chief Digital Officer that led to reversal and recaptured revenue.
 - Connected online behavior to retail purchases by writing complex SQL that gave executive leadership insight into omnichannel customer journey for the first time.
 - Mentored junior analysts, supporting growth & advancing analytical output.
- **Global Ecommerce - Web Analyst**, Specialized Bicycle Components — Aug 2021 - Oct 2022
 - Educated teammates & stakeholders on best practices for using tools/reports & performing analysis.
 - Partnered with data engineers to create data models for new datasets.
 - Performed market research that informed the launch strategy of a new product offering.
 - Reduced OPEX by \$100k annually for team by automating manual processes, allowing organization to simplify technology stack.
- **Digital Analyst**, Tinuiti — Sep 2020 - Jul 2021
 - Principal analyst for clients with annual revenue ranging from \$100 million to \$10 billion.
 - Designed plans to help businesses track & measure performance against their goals.
 - Created reusable analyses for the greater analytics department.
 - Guided marketing experiments to understand incrementality of spend.
 - Grew client accounts by partnering with account managers & junior analysts.
- **Associate Digital Analyst**, Tinuiti — Mar 2019 - Sep 2020
 - Based in Philadelphia, PA.
